

Hydra**Beauty** Facial

Breathe Life into Your Skin

Gillian's

HydraBeauty Facial is one of the most powerful treatments available today, utilising the vortex delivery system.

NEW

HydraBeauty Facial

HydraBeauty Facial is a great skin treatment suitable for all skin types. Using vortex technology, water jets exfoliate and extract impurities whilst bathing your skin with anti-oxidants, hyaluronic acid and lactic acid to name but a few. Incorporating oxygen infusion, BIO microcurrent "natural" facelift, reduction of puffiness and visible face lifting.

Cryotherapy helps boost collagen. High frequency acne management, reducing enlarged pores, fine lines, wrinkles and puffy or dark eyes. HydraBeauty Facial leaves your skin immediately softer, fresher and more hydrated.

NEW

HIGH FREQUENCY

High Frequency oxygenates the surface of the skin, kills P. acne bacteria, stimulates circulation and aids in detoxification, contracts blood vessels minimizing red inflamed skin. ... This kind of treatment also can aid in shrinking pores, reducing signs of aging and stopping persistent acne in its tracks.

ULTRASONIC SKIN SCRUBBER

Skin scrubber helps you deep clean your pores through high-frequency vibration, thus remove blackhead, acne, dead skin, makeup residue and oil in the pores. Clean impurities, blackhead, dead skin cells, dirt and oil in the pores.

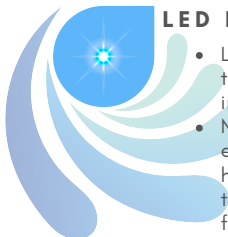

Accelerates skin metabolism, renews skin cells, helping restore elasticity and make your skin firm, smooth and delicate.

CRYOTHERAPY

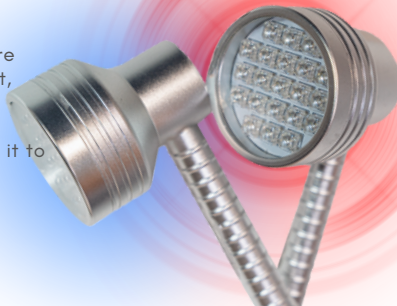

Cryo therapy helps boost collagen, shrink pores and seal the active serum ingredients into the skin.

- Fine lines and wrinkles
- Sagging skin on neck and décolleté
- Decreased skin elasticity
- Post acne and aging pigmentation
- Dark circles and puffiness around eyes
- Hooded Brows
- Loose jaw line area
- Double chin
- Crow's feet
- Acne

LED LIGHT THERAPY

- LED, or light emitting diode therapy, is a skincare treatment that uses varying wavelengths of light, including red, green and blue.
- NASA originally developed it for plant growth experiments on shuttle missions and later found it to have promise for wound treatment. LED light therapy is now used to help regenerate the skin from aging. It's also used for acne.

HYDRADERMABRASION

Advanced serums pushed into the skin to extract, exfoliate and rejuvenate your skin. Antioxidants and hyaluronic Acid are vortex fused to nourish and protect.

HYDRADERMABRASION DIAMOND

Diamond dermabrasion work head can cover the dead skin cells and absorb it, and powerful water absorbent grinding head can completely purify the keratin. Effectively promotes blood flow to the skin and helps produce collagen.

JET PEEL

A jet peel facial is a non-invasive procedure that's often used to combat signs of ageing, dry skin, and acne. During treatment, pressurised streams of air penetrate into the deep layer of your skin called the dermis to deliver cleansers and serums. Jet Peels are gentle enough for people with sensitive skin or skin conditions like acne or rosacea.

OXYGEN INFUSION SPRAY

Oxygen infusion is a specialized skin therapy treatment designed to replenish the levels of hydration in your skin while plumping and smoothing leaving you with a restored youthful appearance.

O₂ INFUSION

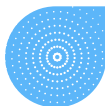

Oxygen infusion is a rejuvenation treatment for the skin. The formation of lines and wrinkles is typically due to decreasing oxygen levels in the skin, by infusing oxygen into the skin, this leaves your skin plump and radiant.

Oxygen therapy uses powerful bursts of compressed air to infuse the skin with a combination of 95% pure oxygen with selected high potent products. This will visibly plump out lines and increase firmness.

BIO MICROCURRENT

You see results within minutes of getting the treatment—that's the fun part. After your first treatment, you'll have a firmer, glowing, more uplifted you. Your skin will appear tightened and hydrated. Treat yourself with this non-surgical face lift.

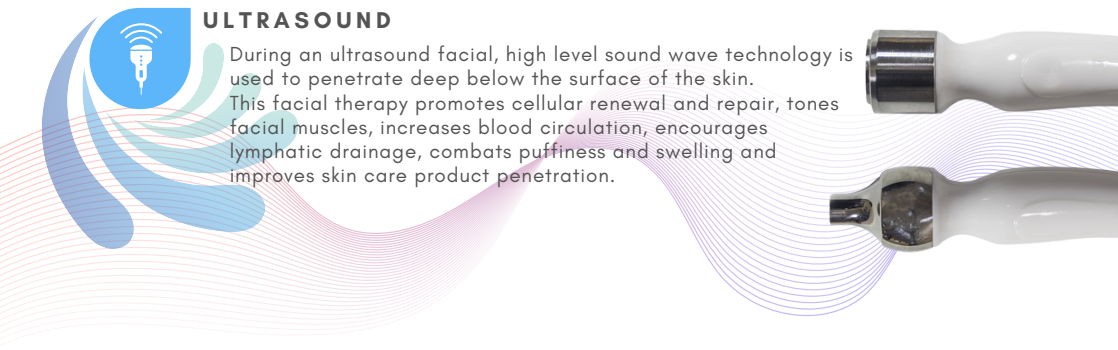

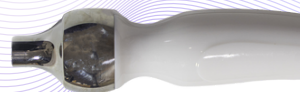

DERMAPEN

The Dermapen microneedling pen provides an unparalleled response through the segmented delivery of microneedles, creating micro injuries to the epidermis (outer layer of skin) and dermis (the inner layer of skin). As a result, the micro injuries encourage the body's innate ability to repair itself.

ULTRASOUND

During an ultrasound facial, high level sound wave technology is used to penetrate deep below the surface of the skin. This facial therapy promotes cellular renewal and repair, tones facial muscles, increases blood circulation, encourages lymphatic drainage, combats puffiness and swelling and improves skin care product penetration.
